Before reading a long book in 592 pages, here is a chance for you to get a fair gist of its content in 1 single page

DatakAristarchy (Decentralized All-Truth-All-Knowledge Aristarchy)

→ **DATAK** and **ESSAD** (**End State Secrecy And Debt**), along with the **GRELL** **Return of ELL** (**Enlightened Logos Liberty**) as the culture of Classical Greece that invented democracy as **Aristarchy**, philosophy and **Tetractys** education, are the 3 tripod **DEGA** legs of **DatakAristarchy**. Public **debt** and state **secrecy** are all eliminated. All **truth** about public affairs, officials or money, plus all **knowledge** useful to humanity, are fully revealed. Hiding any such truth or knowledge is a **serious crime**, be they from any earthly or alien source, or any foreign diplomatic source. Any **centralizing** of such truth or knowledge in any hidden government way becomes **treason** by the top manager hiding it. **Publicity** managers not providing all dangerous product information, and **media** not providing truth and best knowledge useful to humanity also commit a **serious crime**.

→ The country becomes an **Aristarchy**, as *"**Governance by the best ones**"*, i.e. by leaders not only equipped with ***All-Truth-All-knowledge***, but also coming from a system of **classical education forming the 3 levels of the Tetractys** of the human soul. No more lack of truth or knowledge, no secrecy and no public debt can lead to our global **enslavement** by the **FastCABAL**. **Political parties** are financed by no BigMoney, only by yearly membership, and the main party may be called **DEGA**. **Whistleblowers** are all fully protected and possibly even rewarded. **Education** returns **private**, even if in free public infrastructures, not just bad instruction with government propaganda like it is today. **Kallos beauty, truth and love** lead all human activity.

→ With **DATAK**, **ESSAD** and **GRELL**, fully enlightened citizens must all **vote** to maintain citizenship, **voting only 3 governors** with a fully binding **contract** in a lean **TetractArium** instead of in a babbling parliament, using a **fraud-less voting** system called **BAVAD**. With **DATAK** free **Internet** and **ESSAD**, there are no permanent **embassies** abroad, only reinforced **consulates** pre-accepting all legal **immigration** only from abroad, better **helping citizens** while abroad, and reducing excessive **multiculturalism**. Citizens enjoy full freedom of **protest** and **opinion**, even for **hate speech** with open face and no physical violence. Furtive **lobbying** is a **serious crime**, except if via the **DlocTV** channel. With **no public debt, income tax** is eliminated along with **hedge funds** and **derivatives**. All **public financing** is through **DAPAST**, with **only property and sales tax** linked to public **pension** benefits, plus some **tariffs**. No **Bank** can create **new money** as debt, only **Treasury** as **no-debt**. **Provinces** control all public money for the national government. **DATAK** citizens voting in a **BAVAD** way need **no parliament**, and **no** fixed **constitution** that fully binding electoral contracts can overcome. **AI** is good only if open and CONGIPAS, otherwise it is **treason**.

→ A citizen-married-mother maintaining a **fulltime home** gets, for **each child**, a public salary of ¼ the salary of a local hospital nurse-aide. **Same-sex love relations** are legal when not involving violence, anal-sex, or pedophilia, but cannot lead to a **marriage** with children, only to a "**parriage**" without children except if already their own. **Divorce** with minor children can be avoided temporarily through a harmonious government-assisted **DISSLA**. **Medicine** alternative to **BigPharma**, based on **Phytotherapy** is legal, and all **bio-agro-products** of the same municipality or its adjacent neighbor are **sold tax-free** in new **LAFIOS** outlets. Transgenderism, religious human body mutilation of minors, transhumanism or **GMO** are all **serious crimes**. **Justice** becomes *"**Constructive Justice**"* to reduce its times and costs obtaining it. **War** can only be defensive and after referendum approval. **Death penalty** by a firing squad exists, even executed with some public and televised, but only for criminals causing massive damages or many deaths.

→ Full membership to **international organizations** that are unelected or not openly fully **DATAK** compliant is illegal. Organizations may still get involved in collaboration or advice but, on their part, with no enforceable commands to the country. **Land** private property is only for its surface, not for its profound resources. All **religions** with sacred books that include requests of violence from their faithful (like in **Quran**, **Bible**, **Talmud** or **Shariah**) can never be practiced in public, only privately or in **controlled closed** religious temples. **GLOSAN auxiliary language** (**based on Esperanto**) is promoted as an easy common chat speak with anyone worldwide.

If you opened this book called DatakAristarchy from the blue rectangle at the top of the opening page of the website www.EthoPlasin.net, you then have 5 reading options. Option 1 is the full synthesis in 592 pages. Download it first on your computer. Then, to access all the links of the other options, read their limited pages from Option 1.

Symbol of PythagorArium Beauty and Goodness

This magnificent creature is one of the main symbols of beauty and goodness that is offered by the various kingdoms of nature. If, through the **PythagorArium Academy** and **DatakAristarchy**, we want to keep humanity more mobile, more free, and more productive for the good of all, we should imitate more of his good nature as a vegetarian who never kills except in situation of self-defense, and constantly helps all human beings around him to be happier and more successful.
